^a Hawaiian as defined by the U.S. Bureau of the Census For the Census 2000 and subsequent Census Bureau work, the question on race was revised to allow respondents the option to self-identify themselves by selecting one or more races to indicate their racial identities. The table uses the "alone or in any combination" totals.

Note: Since an individual can be counted in one or more race categories, the totals and percents will not sum.

• The American Community Survey (ACS) is an ongoing survey conducted by the US Census Bureau to supplement their decennial census by providing annual data. The data from the ACS is not as detailed as the decennial data but it does provide current estimates on a variety of population indicators.
