

Table 7.38b

Standard Fetal Death Rates of Resident Mothers by Race-Ethnicity and County In Hawai'i: 2013

| Mother's Race-Ethnicity | Mother's Resident County |                  |                |                  |                |                  |                |                  |
|-------------------------|--------------------------|------------------|----------------|------------------|----------------|------------------|----------------|------------------|
|                         | Hawai'i                  |                  | Honolulu       |                  | Kaua'i         |                  | Maui           |                  |
|                         | # Fetal Deaths           | Fetal Death Rate | # Fetal Deaths | Fetal Death Rate | # Fetal Deaths | Fetal Death Rate | # Fetal Deaths | Fetal Death Rate |
| Caucasian               | n/r                      | n/r              | 36             | 10.7             | 11             | 50               | 51             | 92.2             |
| Native Hawaiian         | 20                       | 18.8             | 38             | 12.5             | n/r            | n/r              | 11             | 14.9             |
| Chinese                 | n/r                      | n/r              | 8              | 10.8             | 0              | 0                | 0              | 0                |
| Filipino                | n/r                      | n/r              | 34             | 14.4             | 9              | 42.3             | 20             | 48.8             |
| Japanese                | n/r                      | n/r              | 18             | 13.5             | 0              | 0                | n/r            | n/r              |
| All Others              | n/r                      | n/r              | 42             | 14.4             | 0              | 0                | 15             | 46.3             |

Fetal Death Rate is the number of fetal deaths per 1000 live births plus fetal deaths.  
n/r = Not Reportable, where number of fetal deaths is between 1 and 5.  
Other cells are blinded (----) when only one cell in a row or column is n/r
