

**Table 7.74** Health Insurance Coverage-Uninsured: 2000-2009.

| Year | Uninsured                    |                  |                                 |                          |
|------|------------------------------|------------------|---------------------------------|--------------------------|
|      | U.S. Census Bureau Estimates |                  | Hawai'i Health Survey Estimates |                          |
|      | United States                | State of Hawai'i | State of Hawai'i                | Hawai'i Native Hawaiians |
| 2009 | 16.7%                        | 8.2%             |                                 |                          |
| 2008 | 15.4%                        | 7.8%             | 4.6%                            | 4.3%                     |
| 2007 | 15.3%                        | 7.5%             | 5.2%                            | 4.7%                     |
| 2006 | 15.8%                        | 8.8%             | 4.7%                            | 4.4%                     |
| 2005 | 15.3%                        | 8.6%             | 4.5%                            | 4.1%                     |
| 2004 | 14.9%                        | 8.3%             | 5.2%                            | 5.9%                     |
| 2003 | 15.1%                        | 9.5%             | 5.2%                            | 7.0%                     |
| 2002 | 14.7%                        | 9.8%             | 4.7%                            | 5.8%                     |
| 2001 | 14.1%                        | 9.2%             | 5.5%                            | 7.5%                     |
| 2000 | 13.7%                        | 9.1%             | 5.4%                            | 5.1%                     |

**Source:** Hawai'i State, Department of Health, Hawai'i Health Survey. (Honolulu) US, Bureau of the Census, Current Population Survey (CPS) Annual Social and Economic Supplement (ASEC)

- As with population estimates for the State of Hawai'i, there are two major sources for data on the uninsured each presenting different estimates for the same population. The differences are the results of different procedures and methodologies used in data collection and processing.
